DEPARTMENT OF PARKS.

COMMISSIONERS' REPORT.

HON. PATRICK A. COLLINS,

Mayor of the City of Boston:

SIR, — The Board has the honor herewith to submit this report for the year ending January 31, 1903.

But one addition to our park area was made during the year: One and six-tenths acres, including parts of the private ways known as Reservoir road and Wade street, were added to Chestnut Hill park by a taking made November 12, 1902, which makes the area of that park in charge of this Board 55.4 acres. The area under the control of the Metropolitan Water and Sewerage Board is 160.65 acres, of which 122.7 acres is in water.

To the playgrounds the following additions were made:

On May 16, 1902, 88,668 square feet of land in East Boston, bounded by Cottage, Gove, and Lubec streets, and private lots on Maverick street, were taken for a playground for Ward 2, and subsequently, on January 6, 1903, the Board took a further area of 79,126 square feet, which included a part of Lubec street, making the whole area of the playground 3.85 acres.

On June 26, 1902, the Board took 9.6 acres of land on Washington street and Florence street, between Forest Hills and Roslindale, and near the land previously taken from Harvard College for a playground. This last-named land was given back to the college, in accordance with its desire, and under the provisions of chapter 187 of the Acts of 1901.

On December 8, 1902, the Board added to the Columbus-avenue playground 4,397.4 square feet of land on Camden street, occupied by stables. This land was enclosed on three sides by the playground. It is hoped that the buildings may be found useful in connection with the work of the playground.

Oak square, Brighton, containing 9,796 square feet of land, formerly used for school purposes, was transferred to this department by the City Council March 24, 1902. The removal of the building and the grading of the site have made a marked improvement at this important street junction.

A contract was made December 2, 1902, for a building with lockers and shower-baths for the athletes, and sanitary accommodations in the basement at First-street playground, and plans for other much-needed sanitary and shelter buildings are under way.

Further appropriations are needed to make some of the playgrounds better serve the purpose for which they were acquired, as some of them are not yet provided with desirable conveniences and facilities for play.

A handsome fountain, designed by Mr. Guy Lowell, has been placed at the Westland avenue entrance of the Fens. This we owe to the generous bequest of Mrs. Ellen C. Johnson, in memory of her husband, Jesse C. Johnson, and to the intelligent and unremitting labors of her executrix, Mrs. Robert S. Russell.

A playground is needed in Jamaica Plain and one in the Centre street district, and much more space should be added to the Prince-street playground. A playground in the neighborhood of the Fellows-street playground, for the older youth, would be of much public benefit. The Board can only repeat its suggestion to our rich and public-spirited citizens that no better gift can be made to our city, and no more enduring monument obtained for the giver than a playground.

The pollution of the water in the Fens by the sewage discharge from Stony Brook menaces the health of the residents in this part of the city, and is an annoyance to visitors to this park. It is a serious obstacle to the improvement of the neighboring territory. This matter has received careful consideration by this Board. We have called attention to it in previous reports and in communications to the Mayor and the Board of Health. This Board is powerless in the matter, which now rests with the Street Department. The report of the Commission on the Charles River dam,

appointed by a resolve of the Legislature of last year, is awaited with interest, as it will deal with this question as well as others affecting the Fens basin. No time should be lost in giving at least temporary relief to the Fens basin from the foul water which now enters into it. This is a most difficult and serious problem to the Park Department of Boston.

Full details of the work of the department during the year will be found in the accompanying reports of our Superintendent and Engineer.

Respectfully submitted,

CHARLES E. STRATTON,

LABAN PRATT,

JAMES M. PRENDERGAST,

Commissioners.

Boston, January 31, 1903.

SUPERINTENDENT'S REPORT.

TO CHARLES E. STRATTON, LABAN PRATT AND JAMES
M. PRENDERGAST, *Commissioners* :

GENTLEMEN, — I herewith submit a report of the work performed, under the direction of your Board, during the year 1902.

FRANKLIN PARK.

The improvement in the old woodlands of Franklin Park resulting from the careful and continued thinning out of all overcrowding trees and the pruning off of dead and diseased branches is very marked. This is especially noticeable in the greater spread of branches in the trees and in the increase of desirable undergrowth. A considerable area of woodland has been cleared of tree weeds, notably in the woods opposite and west of the Overlook, on Juniper Hill, and in the woods bordering Morton street. On account of insufficient funds little was done the past season in adding loam to the sterile parts of the old woods. This is regrettable, and it is to be hoped, in the interests of the future, that sufficient money will be given the Board to permit the carrying on of this work.

Thinning out in the plantations was continued, as in past years, to allow room for the full development of trees and shrubs. A large part of the material removed was used in preparing new plantations, and the remainder was sold.

The larger part of the work of the past season in Franklin Park, however, consisted in the preparation of ground for planting and in the care of the young plantations. These plantations, owing to the dryness of the three preceding seasons, required constant cultivation and the application of mulchings for the conservation of moisture in the ground. This work extended generally over the entire system of parks, and, in consequence, the trees and the shrubs are in good growing condition.

The wall on Walnut avenue, between Seaver street and the entrance to Franklin Park, was completed last spring, and the slopes behind the wall were graded and planted. The construction of the widened street at this point by the Street Department would improve very much this important entrance to the park.

The drainage of the Nazingdale hollow was extended into Ellicottdale, and spurs were carried into the wet spots. It is expected that this will complete the tile-drainage of the golf course. The beech plantation near the Refectory also was tile-drained.

The public have shown much interest in a small collection of native wild fowl colonized at Scarboro' Pond. In view of this arrangements have been made for additions to the number of species. The location is an admirable one for this purpose, as the pond contains three islands well suited for nesting and for protection from dogs. The pond is also a favorite resort of the public.

Several pieces of iron and wood-working machinery have been purchased for our repair shops. Our equipment now enables us to do all our repair work at home, including machine and blacksmith work, horseshoeing, carpentering, plumbing, painting, pipe-work and harnessmaking.

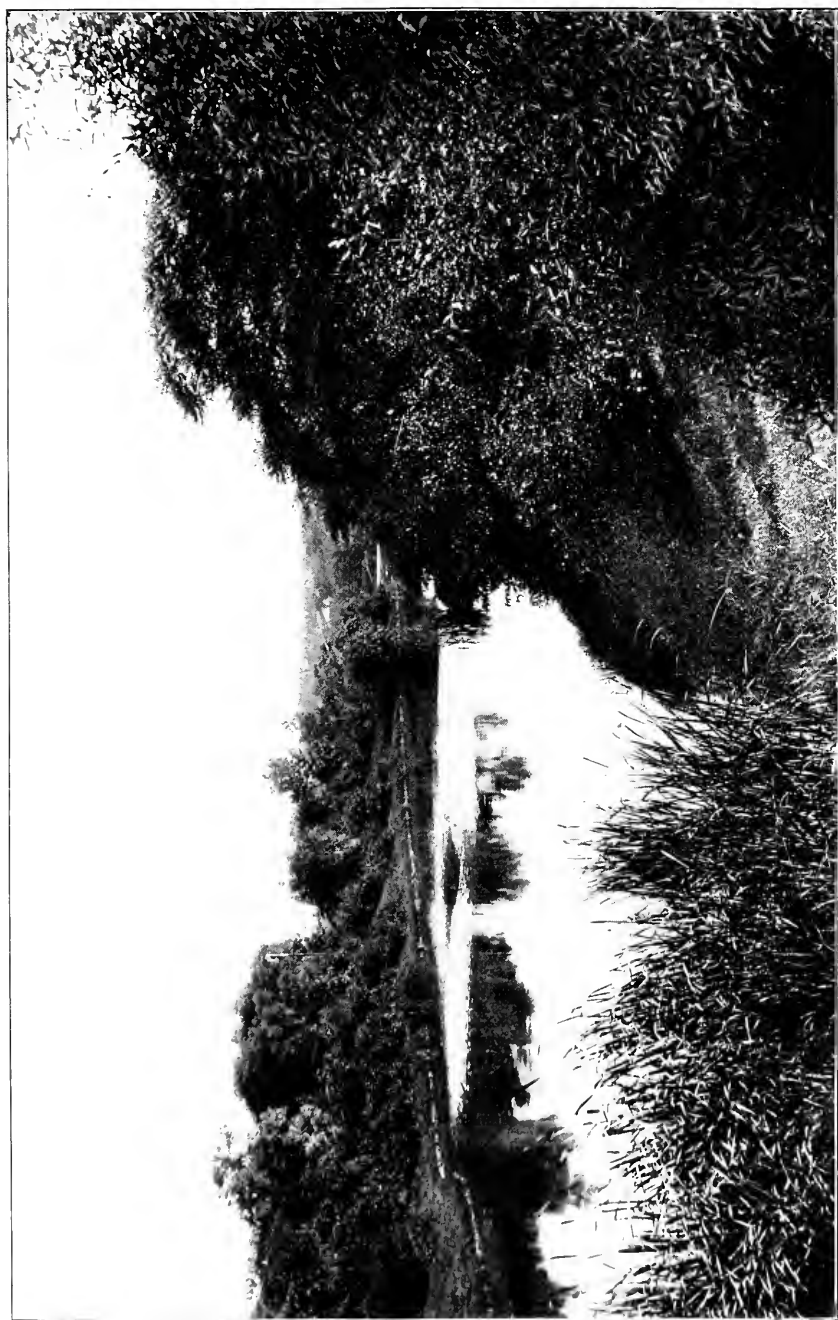

ARNOLD ARBORETUM.

The usual care of the roads and walks was continued.

OLMSTED PARK AND RIVERWAY.

Along the Riverway and the shores of Leverett Pond the work of extending the loam bed to the water's edge is in progress. This work will be completed in time to allow of the planting in the spring of shrubbery nearly to the shore line. Semi-aquatic plants will be planted along the shores. This treatment, by softening the present hard shore line, will greatly improve this beautiful piece of water.

The eight pairs of European swans purchased and placed in Jamaica Pond, and the native geese and ducks, proved very attractive to our many visitors.

OLMSTED PARK — HEAD OF LEVERETT POND.

THE FENS.

The subject of the Fens is a discouraging one, not alone from the foul condition of its pond, but from the fact that its horticultural possibilities are curtailed by a lack of loam and by the sterile underlying gravel.

By constant tilth, shrubbery may be kept in good growth, yet trees cannot attain fair proportions under such conditions. From time to time additions of loam should be made until the accumulated depth is sufficient in body to afford nutrition for large growth, and, at the same time, to conserve the moisture, which is now quickly absorbed by the gravelly subsoil.

The trees bordering the drives have had additions made to their loam beds until they now have a continuous bed of loam eight feet wide by three and one-half feet in depth. Further additions of loam will be required before a fine avenue of trees can be expected. Appropriations for increasing the depth of soil in the Fens would be a wise measure, in view of its importance to the future.

COMMONWEALTH AVENUE.

The improved appearance resulting from the thinning out of the trees on the eastern end of Commonwealth avenue is clearly apparent. The remaining trees, many of them good specimens, can be seen in their individuality, and they now have more opportunity for the spread of their branches than when they were closely crowded. A thinning out of the younger trees, between Dartmouth street and Massachusetts avenue, was made during the past season. These trees had grown to a point where their branches were beginning to intermingle, and serious crowding and damage would soon have resulted. This portion of the avenue is underlaid mostly with porous gravel, which has a covering of loam not exceeding twelve or thirteen inches in thickness. These conditions certainly are not conducive to a growth of fine trees.

CHARLESBANK.

This useful park continues to draw large numbers of people. The mounds are reserved for women and children ;

the men, however, have free access to the walks and the seats on the river front. The gymnasium at the east end is for men and boys, the other at the west end for women and children. Competent teachers are in charge of the gymnasia, those for the women's gymnasium being under the direction of the Massachusetts Emergency and Hygiene Association. Large numbers enjoy the skating furnished on the men's gymnasium grounds.

WOOD ISLAND PARK.

Tree growth on Wood Island continues to be satisfactory in spite of its exposure to strong winds; and the number of visitors, influenced by the improved conditions, increases with each year. The gymnasium, ball grounds, cricket grounds, tennis and foot-ball grounds and skating fields have been kept in good condition, and have been largely patronized during the past season.

CHARLESTOWN HEIGHTS.

Outside of the regular maintenance of the grounds, no work of importance was done at this park during the past season. Being located opposite a large school-house, and being a favorite resort for a considerable number of pupils, the upkeep is relatively large and is out of proportion to the extent of the grounds.

MARINE PARK.

In spite of its exposed position this valuable and beautiful breathing place is assuming quite a wooded appearance. The condition of the trees and shrubbery, like that at Wood Island Park, proves that the bleak shores and islands of the bay can be clothed with foliage.

No work other than that of maintenance was done the past season, with the exception of the planting of shrubbery in various places around the ponds.

On account of the coolness of the past summer bathers were not so numerous as during preceding summers. The band concerts given in July and August were attended by very large numbers of people. The steamboat service

between Castle Island and the public landing received the usual patronage.

STRANDWAY.

The work of filling, grading and road-making was continued on the Burnham wharf property. Sufficient ground was graded to form a good ball field of three diamonds, which were much used, as were later the three acres which were flooded for skating. The work of filling out into the bay by the teams of the Sanitary Department is still in progress.

CHESTNUT HILL PARK.

Outside of the regular maintenance work little was done in this park except the pruning and thinning out of the old woodlands. Some planting also was done, and preparation made for further planting in the spring. The acres added by purchase to the north border will permit of a wider planted belt, where a border screen is much needed.

BERNERS SQUARE.

In this newly acquired park some thinning of the trees was done. A small appropriation will suffice for grading and drainage.

DORCHESTER PARK AND WEST ROXBURY PARKWAY.

Overcrowding and diseased trees were thinned out. At West Roxbury Parkway the fine white oaks near Weld street were pruned of dead and diseased limbs. The ordinary maintenance of the wild bridle-path was continued.

THE NURSERY.

In the Franklin Field nursery a quantity of nursery stock from seed beds was set out last spring. The stock generally is in good condition, and affords a varied assortment of trees and shrubs from which to draw for planting. The newly broken ground was sowed to oats and millet for a forage crop. Subsequently the ground was twice ploughed, and it is now in fine condition for nursery work. To determine the species best adapted for golf greens and other games

requiring a tough turf, a collection of grasses was sown in the nursery last spring (for experiment and observation).

FRANKLIN FIELD.

(77 Acres.)

The Stratton street and Blue Hill avenue borders of Franklin Field were graded, and reinforced in places with additional loam, for the belt of trees varying in width from forty to sixty feet to be planted in the coming spring. These trees will serve as a protection and a background for the field.

The Street Department having completed the drainage conduits early last spring we were enabled to level up and throw the whole field open to use. Subsequently this department filled the old open ditch along the Talbot avenue side, and prepared the ground along its course for a row of trees.

As set forth in recent reports the field generally is uneven from unequal settlements in the original grading. The work of regrading is too expensive to be undertaken under our maintenance appropriation.

The ball field is in increasing demand. On Saturday afternoons, especially, the whole area is occupied by baseball and cricket teams. About forty acres were flooded last winter for skating.

CHRISTOPHER GIBSON PLAYGROUND.

Dorchester Avenue and Park Street.

(5.8 Acres.)

In the triangle, or children's corner, some simple apparatus was set up, which consisted of swings, swinging ladders and teeter boards. A small shelter pavilion was also built, a basket-ball outfit was supplied, and tennis courts were laid out. The games were carried on under the superintendence of a teacher, and this effort to interest the children and direct them in their play proved quite successful. The expense was light, and the results would fully justify the extension of this branch of playground work.

OLMSTED PARK — POOL NEAR WILLOW POND.

The field was well patronized during the season, commencing with base-ball, running through tennis, quoits, and ending with skating in winter.

SAVIN HILL BEACH.

Springdale Street, Dorchester.

(18.6 Acres.)

The bathing-house at this beach contains thirty-one rooms for women and fifty-four for men. The number of bathers last season was 65,500. The accommodations were found to be inadequate, and at times several persons had to occupy one room. The beach is well sheltered, and very popular with the residents of the neighborhood. Additional rooms are needed.

NEPONSET PLAYGROUND.

Neponset Avenue.

(18 Acres.)

No work other than that of maintenance was done on this playground. Settlements of the marsh under the filled part of the ground continue to give trouble. The ball field, however, was kept in fairly good condition. The skating field was flooded as usual.

MYSTIC PLAYGROUND.

Chelsea Street and Mystic River.

(2.3 Acres.)

Swings, teeter boards, ladders, and sand boxes were installed early last season at one end of the playground. A small pavilion was also built for shelter. This section was fenced off from the remainder of the playground by a woven wire fence. A teacher was employed, and this resulted in a crowded children's corner.

CHARLESTOWN PLAYGROUND.

Main and Alford Streets.

(14 Acres.)

The filling of this playground is not fully completed. There is, however, sufficient smoothly graded ground for

present demands, including an area of 2.2 acres for flooding for skating in winter.

ROGERS PARK.

Lake and Foster Streets.

(6.9 Acres.)

The slope on the Foster street side of this park was planted with shrubs last spring, and some filling and grading was done on the playground. More graded space is needed, as this playground is much frequented by the young men of the neighborhood. To obtain this space it will be necessary to carry underground the brook now crossing the park. Other needs of this park are filling for the pond and play ground, also sanitary conveniences and a shelter.

NORTH BRIGHTON PLAYGROUND.

Western Avenue and Harvard Street.

(14 Acres.)

No work other than that of maintenance was done at this playground the past season. An extension of the graded area is needed for playground purposes, as are also fences and the preparation of the ground for the planting of trees around its border. A shelter and sanitary building is also much needed. The skating field on this playground was flooded the past winter.

BILLINGS FIELD.

Lagrange, near Centre Street, West Roxbury.

(11 Acres.)

The work of planting the slope at Bellevue street and grading and seeding the tennis courts was completed last spring. The Lagrange street border also was graded and prepared for planting with trees. Under-drainage was laid in various wet places, which, with the deepened outlet across Lagrange street, very much improved the grounds. A bog-hole under one portion of the field gives trouble by settling, and repeated filling has not yet found a solid bottom. The grounds were flooded as usual last winter for skating. Sanitary and shelter accommodations are needed.

ROSLINDALE PLAYGROUND.

South Walter and Robert Streets.

(3.7 Acres.)

During last spring this playground was finely graded and seeded, making a very good field for ball playing. The grounds are popular and much used. On this account it was found necessary to remove the two large willows which stood in the centre of the playground and interfered with the games. A sanitary and shelter building is needed here, as are also a division fence between the Pearce property and the playground, and a retaining-wall on Robert street. A skating area of 1.6 acres was provided last winter.

COLUMBUS-AVENUE PLAYGROUND.

(4.8 Acres.)

The smoke and dust of the neighboring railroad have proved too severe for the tender foliage of the Norway maples planted around the borders. No work of construction was done during the past season.

The same arrangement as to the management of the playground that obtained last year has been continued. The Park Department keeps charge of the ordinary maintenance of the grounds and the skating field, while the Civic League is allowed to assume the management and expenses of the games. The grounds were largely attended during the season.

PRINCE-STREET PLAYGROUND.

Prince and North Bennet Streets.

(0.4 Acre.)

No work other than that of maintenance was done here during the past season.

FIRST-STREET PLAYGROUND.

First and M Streets, South Boston.

(4.6 Acres.)

On account of the great difficulty experienced in holding water on this playground, and the consequent unsatisfactory

results, further effort to form an ice field for skating has been abandoned until a proper bottom can be made. In the mean time the Strandway playground, which contains a good field for ice, will serve this district for skating.

Bleachers with a seating capacity of 500 have been erected in the ball field.

FELLOWS-STREET PLAYGROUND.

Fellows and Hunneman Streets.

(0.85 Acre.)

The introduction into this playground of apparatus for children's use made it at once popular. Instead of playing on the sidewalks, as had hitherto been their preference, the children swarmed into the playground. Children's allotment gardens were laid out and planted, and each owner of a plot vied with the other in bringing forth results. A little surreptitious changing of plants was done occasionally, yet a fair show remained to the end of the season, when the plants were taken by the children to their homes. The teacher, as at the other playgrounds, contributed largely to the success of the experiment. Sanitary accommodations are needed here, also an open-sided shelter over the sand boxes.

WARD TWO PLAYGROUND.

Cottage Street, near Maverick Street, East Boston.

(3.8 Acres.)

A portion of the new playground acquired by purchase during the past year was roughly graded, and a base-ball field laid out for use last spring. This playground is conveniently situated for a well-populated district. Sanitary and shelter accommodations, fencing, and ground preparation for planting bordering trees are its needs.

FOREST HILLS AND MT. HOPE PLAYGROUND.

(9.6 Acres.)

This playground, acquired by purchase during the past season, is conveniently located for the Forest Hills, Roslindale and Mt. Hope districts. The ground is nearly level, and will require comparatively little labor to bring it into

good condition for use. By using a six-ton steam roller last season two fairly good diamonds were made and equipped with backstops. The field was used also for foot-ball games last fall. An appropriation is needed for grading and for a sanitary building.

OAK SQUARE.

Brighton.

(0.22 Acre.)

This small triangle, which was turned over to the Park Department by the City Council last season, contained an old school building. This has been removed, and the asphaltum flooring of the yard has been taken up. There are a few good trees on the triangle, and for their benefit some gravel was removed from the surface and loam substituted. A little additional loam is needed to finish the grading in readiness for seeding. The construction of a few seats under the shade of the trees will make a pleasant resting place.

SPORTS AND PASTIMES.

An increased interest in golf was manifested the past season. The total attendance at the Franklin Park links was 47,469 as against 31,007 the previous year. The six-hole course for beginners proved of great service in relieving the nine-hole course from overcrowding, much of which had been caused by the slow play of novices in the game.

The increased demand for tennis courts necessitated the laying out of a number of new courts in various parts of the park system. We now have over one hundred courts in operation, which, on Saturdays and holidays, are all in use.

The past winter did not prove a satisfactory one for skating. Quickly alternating periods of frost, thaw, or snow made the maintenance of ice for skating very difficult. The following table gives statistics in detail :

SKATING — SEASON 1902-1903.

Name.	Area, Acres.	Hockey Rinks.	No. of days Skating.	Approximate Attendance.
Billings Field.....	5.0	1	32	11,200
Charlesbank.....	1.4	..	26	18,300
Charlestown Playground.....	2.2	..	25	7,050
Columbus-avenue Playground.....	2.6	1	15	7,750
Christopher Gibson Playground.....	1.95	..	29	13,500
Franklin Field.....	35.0	2	30	70,075
Jamaica Pond.....	64.5	2	17	31,900
Neponset Playground.....	3.3	..	24	12,000
North Brighton Playground.....	3.3	1	17	1,950
Roslindale Playground.....	2.1	1	33	14,300
Strandway Playground.....	3.0	..	27	40,275
Scarboro' Pond.....	4.75	..	8	1,550
Wood Island Park.....	7.9	..	23	18,550
Totals.....	137	8	306	248,400

Curling was enjoyed by its devotees at Scarboro' pond. Several matched games were played, which were watched with interest by many people.

At the various playgrounds, base-ball, foot-ball, and cricket games were amply provided for, and largely attended both by players and spectators. Forty-four regularly equipped diamonds were maintained by the department. The Franklin Park playground, in addition, furnished accommodation for from twelve to fifteen games for boys and young men.

Details of measurements of work performed during the past season will be found in the report of the engineer.

Your Superintendent desires to note his appreciation of the able services of C. E. Putnam, engineer, and Messrs. J. B. Shea and J. W. Duncan, assistant superintendents, in the execution of the work of the department.

Respectfully submitted,

J. A. PETTIGREW,
Superintendent.

ARBORWAY—BORDER PLANTING.

ENGINEER'S REPORT.

MR. JOHN A. PETTIGREW,

Superintendent:

DEAR SIR, — The following report for the year ending January 31, 1903, is submitted:

COMMONWEALTH AVENUE.

Curbs across ends of planting spaces

raised and reset	1,290 linear feet.
Area of walk resurfaced with gravel	8,500 square yards.
Drain pipe laid, 10-inch	245 linear feet.
Catch-basins built	2.
Loam bought	127 cubic yards.
Area regraded and seeded	8 acres.

A new wearing floor has been laid on the bridge at Charlesgate, and the drive at Hotel Somerset has been changed to make a carriage entrance to the hotel.

THE FENS.

The deposit of foul mud and sewage in the Fens Pond is probably as large as it was before the pond was partly cleaned in 1898, and, should the coming summer be unusually warm, the condition of the pond will be worse than ever before.

The cleaning of the pond will be very expensive, and, if done while the pollution of Stony Brook is allowed to continue, will give only partial relief, and that will be temporary. With the present quantity of pollution entering the pond it is impracticable, if not impossible, to maintain currents sufficient to prevent the fouling of the water and the continuous accumulations of deposits of foul mud.

The foul-flow conduit, often recommended by the Park and Street Departments, should be built at once, and immediately after it is built the pond should be thoroughly cleaned. It can then be easily kept clean and attractive, and, if the Charles-River dam is not built, will become, what it was designed to be, a salt-water basin surrounded by salt marshes; or, if the dam is built, it will become what will be much better, a sluggish fresh-water stream, flowing between low banks covered with a luxuriant vegetation.

The drinking fountain and ornamental gateway that is being erected at Westland entrance, under the will of the late Ellen C. Johnson, is nearly completed.

RIVERWAY.

A new wearing floor has been laid on the Audubon-road bridge, and the approach to Longwood bridge has been widened and surfaced.

OLMSTED PARK.

A floating island of barrels and timber, covered with loam one foot in depth, has been placed in Jamaica Pond for a nesting place for the water fowl.

Ten tennis courts have been laid out at Pine Bank, near Perkins street.

Loam bought 129 cubic yards.

ARBORWAY.

A new wearing floor has been laid on the bridge over Stony Brook.

FRANKLIN PARK.

Boundary wall built	419 linear feet.
Walks graded and surfaced	1,100 square yards.
Drain pipe laid, 10-inch	125 linear feet.
Drain pipe laid, 2-inch	3,060 linear feet.
Bubble fountain erected	1.

The duck-house has been moved and enlarged; the temporary office and tool-house has been moved, and the interior

has been rearranged; and a temporary paint-shop has been built. Scarboro' Hill and Juniper Hill are being cleared of boulders.

ARNOLD ARBORETUM.

Drain pipe laid, 8-inch	. . .	450 linear feet.
-------------------------	-------	------------------

WEST ROXBURY PARKWAY.

Material from the widening of Walter street has been spread in the grove between Centre and Walter streets.

FRANKLIN FIELD.

The drainage ditch along Talbot avenue has been filled, and the grading and loaming of that side of the field has been completed.

STRANDWAY.

Two wharves and about thirty old buildings have been removed from the land recently taken near Mercer street. The grading and loaming of Columbia road across this land has been nearly completed, and the Telford foundation has been laid on 1,000 linear feet of the driveway. At the head of Old Harbor street there is an area of about 70 acres of flats and marsh inside of the harbor line that can be filled. This is an excellent location for a large athletic field.

Curbstone set	1,065 linear feet.
Telford foundation laid	4,220 square yards.
Drain pipe laid:		
18-inch	15 linear feet.
15-inch	550 linear feet.
10-inch	290 linear feet.
Water pipe laid, 4-inch	90 linear feet.
Catch-basins built	10.
Loam bought	8,327 cubic yards.
Filling bought	7,696 cubic yards.

CHESTNUT HILL PARK.

Additional land taken	69,541 square feet.
Tile drain laid, 2-inch	1,900 linear feet.
Tennis courts laid out	3.

OAK SQUARE.

The old school-house has been moved and the ground graded.

Loam bought	207 cubic yards.
-----------------------	------------------

COLUMBUS AVENUE PLAYGROUND.

The Civic League has built a fence along Columbus avenue and extended observation seats 150 feet.

NORTH BRIGHTON PLAYGROUND.

Filling bought	290 cubic yards.
Loam bought	149 cubic yards.

ROGERS PARK.

The Faneuil Valley brook conduit, above and below the park, has been built, and should be extended across the park. It will cost about \$3,000.

Filling bought	1,818 cubic yards.
Loam bought	533 cubic yards.

FELLOWS-STREET PLAYGROUND.

The boundary fence has been lowered, and twelve swings and five tilting ladders have been erected.

ROSLINDALE PLAYGROUND.

The ground has been cleared of stones and trees, and 307 linear feet of tile drain has been laid to take away the leakage through the dike.

BILLINGS FIELD.

Drinking fountains erected	1.
Tile drain laid	150 linear feet.
Filling bought	1,561 cubic yards.
Loam bought	339 cubic yards.

CHRISTOPHER GIBSON PLAYGROUND.

Twelve swings and five tilting ladders have been erected.

FIRST-STREET PLAYGROUND.

A locker building and sanitary, which will contain shower baths and 282 lockers, to be used in connection with the gymnasium, also sanitary accommodations for men and women, is being erected, and will be completed about May 1.

MYSTIC PLAYGROUND.

Twelve swings and five tilting ladders have been erected.

C. E. PUTNAM,
Assistant Engineer.

REPORT OF THE COMMITTEE OF THE MASSACHU-
SETTS EMERGENCY AND HYGIENE ASSOCIATION
IN CHARGE OF THE WOMEN'S AND CHILDREN'S
DIVISION AT CHARLESBANK.

BOSTON, January 5, 1903.

To the Honorable Board of Park Commissioners :

GENTLEMEN, — The gymnastic and educational work at Charlesbank continues with unabated zeal, though we have no new features of special interest to report to you for this, the twelfth year of our superintendence of the place.

During the summer season, from May 15 to October 1, the number in the gymnasium on a hot day at noon varied from two or three to two hundred or more on a fine Saturday afternoon. On the playground there were slightly fewer than last year, owing probably to the number of cool, misty, damp days. At times, however, several hundred appeared there and in the sand-boxes, one hundred and twenty-five often playing together in a single game at one time.

There were the usual class lessons for beginners and for advanced work, as well as the free or voluntary gymnastic work, one class in the middle of the summer meeting at 6.30 P.M. The "Little Beginners'" class met on Saturday mornings, with an enrolment of sixty-two and an average attendance of twenty-four, but the "Big Beginners" had a hundred and eighteen names on their roll. The devices of plays in the sand-boxes and of games, gymnastic and otherwise, were endless. The kindergarten occupations and the dolls' dress-making classes were unusually successful. The hurdy-gurdy, provided once a week by a friend, in the summer, was as much enjoyed by the mothers as by the dancers.

Books, magazines and games have been given by many friends, though more are always wanted, which occupy and amuse the children in hot summer days as well as in winter, after the class work is over.

Spray baths were used by large numbers of the children who wore bloomers. One thousand seven hundred and eleven baths were taken from June 1 to September 9, exclusive of those taken by the women after class work, of which no record is kept.

Owing to the illness of Miss Cutler for many weeks, her place was filled by Miss Agnes Otis Brigham, whose assistants were Miss Mannship, Miss Haskell and Miss Phelps. In the autumn, Miss Cutler resumed her position and is in sole charge of the winter work, when all the movable apparatus is placed in the large upper hall.

From October 1 to May 15 there are two evening classes for grown-up girls, and two morning classes for women and four classes for children (three in the afternoons when school is over and one on Saturday mornings), who, after their regular gymnastic exercise, are allowed the delights of "scrapping"; that is, of pasting printed anecdotes, verses and pictures in scrap books, each child having her own hero or heroine, McKinley, Lincoln, Ralph Waldo Emerson, Queen Victoria being favorite subjects for enterprise. This side development of Charlesbank under the guidance of Miss Cutler, which yet is not allowed to interfere with its legitimate work, is bringing large influences for good into the lives of the children.

Miss Crowley is the pianist for the winter classes, her salary being borne by the association and the piano being lent by a friend.

The committee is very grateful for the wise attention given by Mr. Pettigrew and his assistants to the interests of Charlesbank and for their readiness to confer with your committee in all helpful ways.

Respectfully submitted,

KATE GANNETT WELLS,
ANNA PHILLIPS WILLIAMS,
MABEL DELANO LORD,

For the Committee.

FINANCIAL STATEMENTS.

I.
